

Kota Kinabalu Image Map Project - Consolidation

This document consolidates all prompts and development steps for the Kota Kinabalu Nature Map project.

1. Initial Request

****Prompt:**** create an image map of the Kota Kinabalu area showing the top 15 places to visit for a first time visitor.

****Action:**** Researched top 15 places and proposed an interactive SVG-based map.

2. Approach Selection

****Prompt:**** *User selected "Static Image Map" approach over Interactive SVG.*

****Action:**** Updated the implementation plan to use a static image map base with interactive overlays.

3. Pivot to Nature Focus

****Prompt:**** edit the map to show places of nature.

****Action:**** Replaced urban/cultural landmarks with 15 nature-focused locations (Wetlands, Wildlife Parks, Islands, etc.).

4. Accuracy Refinement

****Prompt:**** some locations do not seem correct. please update.

****Action:**** Adjusted relative positions of markers to better reflect real-world geography.

5. Adding Key Anchor: Gayang Friendly Water House

****Prompt:**** add Gayang Friendly Water House to the map and make it in Red.

****Action:**** Added the specific stilt house location with a unique red marker and detailed description.

6. Global Accuracy Overhaul

****Prompt:**** revise all locations for accuracy.

****Action:**** Performed a high-precision coordinate update for all 16 markers relative to the city center and coastline.

7. Minimalist Shift (Background Removal)

****Prompt:**** remove the background.

****Action:**** Removed the blue water background from the SVG and set the web page background to white.

8. Absolute Minimalism (Geography Removal)

****Prompt:**** remove all land and sea details from the map.

****Action:**** Overwrote the base SVG with a blank canvas, leaving only the markers in their relative positions.

9. Adding Travel Logistics

****Prompt:**** add driving time and distances from Gayang Friendly Water House to all the other locations on the map.

****Action:**** Calculated and added "Travel Tags" showing km and minutes from Gayang for every location.

10. Re-adding Urban Context

****Prompt:**** add Kota Kinabalu city center to the map.

****Action:**** Added the KK City Center marker and its travel metrics from Gayang.

11. Dark Mode Implementation

****Prompt:**** use a dark background.

****Action:**** Implemented a full dark theme with charcoal background, glassmorphism panels, and glowing markers.

12. City Center Distinction

****Prompt:**** use orange for the Kota Kinabalu City Center location.

****Action:**** Updated the KK City Center marker to orange for clear visual separation from nature and starting points.

13. Expansion: Out-of-City Highlights

****Prompt:**** add 10 more places which are less nature and good for first time visitors to KK which are away from the city center.

****Action:**** Added 10 cultural and experiential locations located in Tuaran, Tamparuli, Kundasang, and Penampang. Introduced a ****Blue Marker**** type for these sites and calculated travel metrics from Gayang.

Summary of Final Files

- `index.html`: Main structure with dark theme.
- `styles.css`: Dark mode styles with color-coded markers (Green, Red, Orange, Blue).
- `script.js`: Data for 27 locations with comprehensive travel metrics from Gayang.
- `assets/map-base.svg`: Blank coordinate-space canvas.
